Utility Patent
Ser. No. 09/843,974

**PLEASE INCLUDE THE FOLLOWING CLEAN VERSION OF THE AMENDED
CLAIM(S) PURSUANT TO 37 CFR 1.121(C)(1)(I)**

1. A golf putter apparatus comprising:
a linearly elongated handle having a lower end;
a club head affixed to said lower end having a first side ridge mounted parallel to a
second side ridge opposite a center bridge.
2. The golf putter apparatus of Claim 1, wherein said first side ridge is symmetric with said
second side ridge.

3. (Once Amended) The golf putter apparatus of Claim 2, wherein each said first side ridge and
said second side ridge each have an ellipsoidal upper curvature opposite a rounded trapezoidal
lower surface.

4. The golf putter apparatus of Claim 3, wherein the overall length of each said side ridge is
4-7/16 inches.

5. The golf putter apparatus of Claim 3, wherein each said side ridge has a smooth outer
perimeter for allowing said lower surface to slide easily across the surface of the grass or sand
upon which it will be used.

6. The golf putter apparatus of Claim 1, wherein said center bridge spans between said first side ridge and said second side ridge along an upper curvature of each said respective ridge.
7. The golf putter apparatus of Claim 6, wherein a lower edge of said center bridge is upwardly offset from the lower surface.
8. The golf putter apparatus of Claim 6, wherein a lower edge of said center bridge is upwardly offset from the lower by a vertical offset of approximately 7/8 inch.
9. The golf putter apparatus of Claim 1, wherein said handle is linearly elongated and having a cantilevered angled attachment portion for attachment within a receiving orifice.
